# Flutter Covid 19 Tracker

## Collaboration with Flutter Zimbabwe community

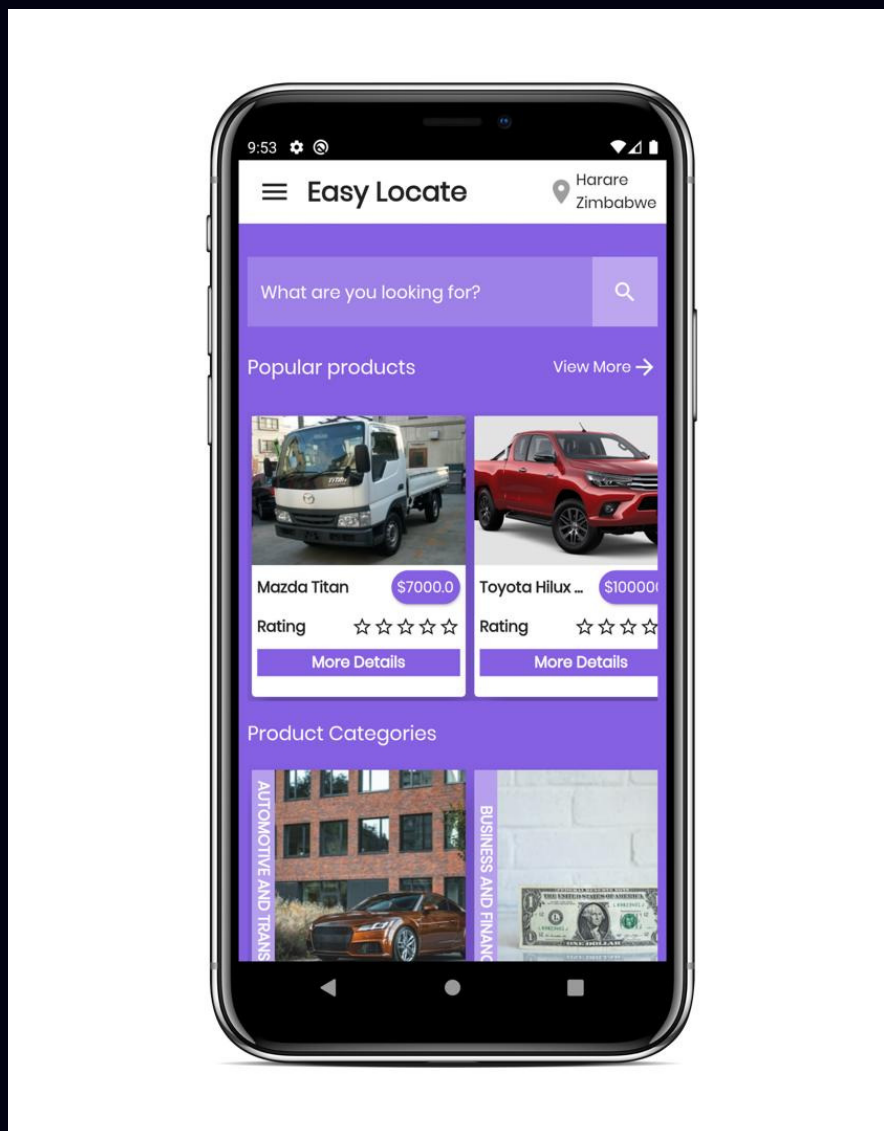

<https://github.com/flutterdevzim/CoVID-19-Tracker>

## Description

NB: Flutter Zimbabwe community project in which I contributed to.

This app is a Covid19 stats tracker for Zimbabwe – The app also features safety tips, self checker, details for health officials and tracking of the usage of Covid19 funds

# Easy Locate

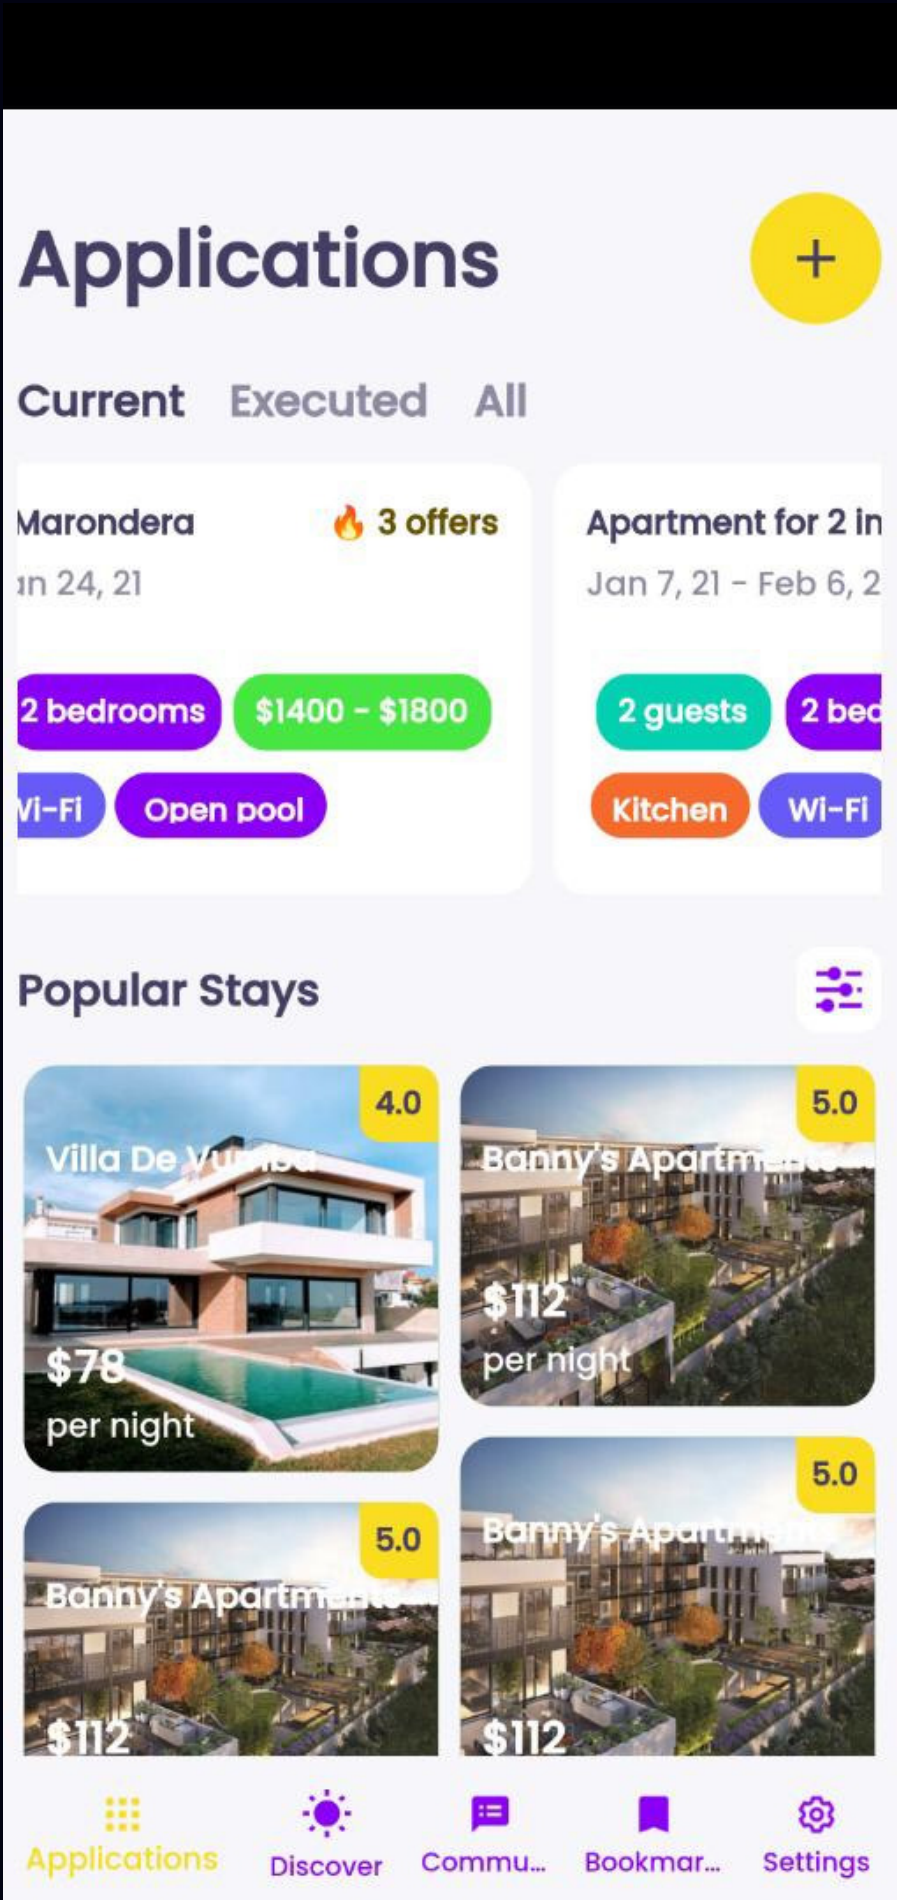

<https://github.com/iamngoni/Easy-Locate>

## Description

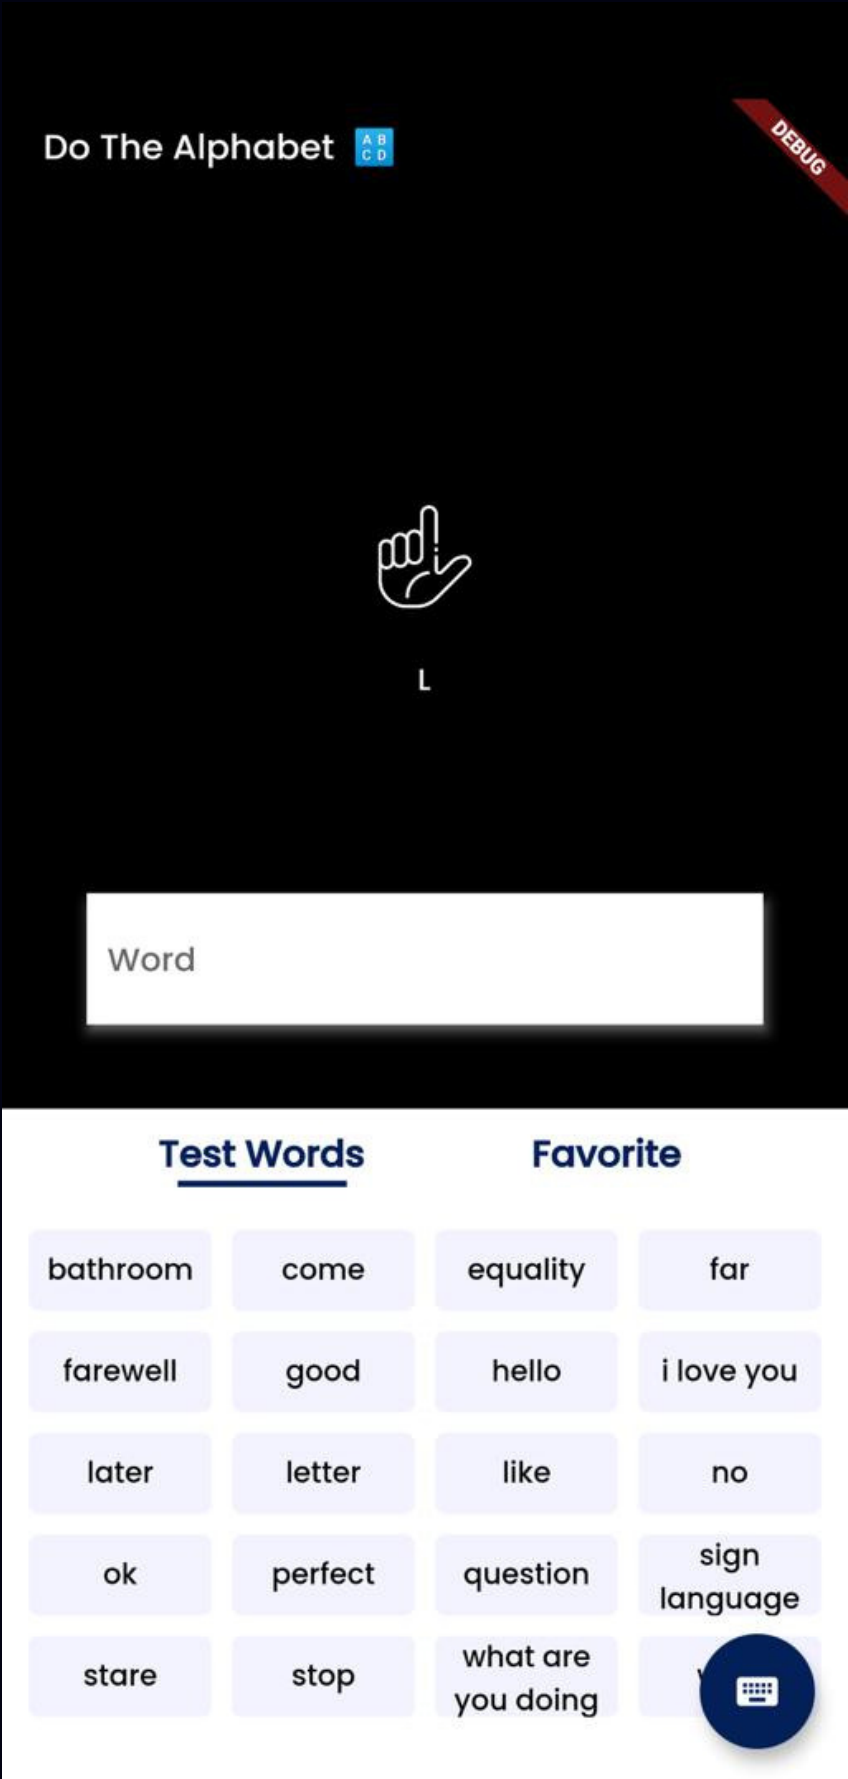

This app allows customers to search for any products and the apps will show stores nearby with that product – it also provides you the shops details, product details (pricing, etc) and allows you to view the shop location on a map aided with navigation features to the shop. The mobile app is accompanied with a web portal for businesses / shop owners to upload the products.

# Trip Accomodation

Link: [https://github.com/iamngoni/booking\\_app](https://github.com/iamngoni/booking_app)

# Sign Language Mobile App

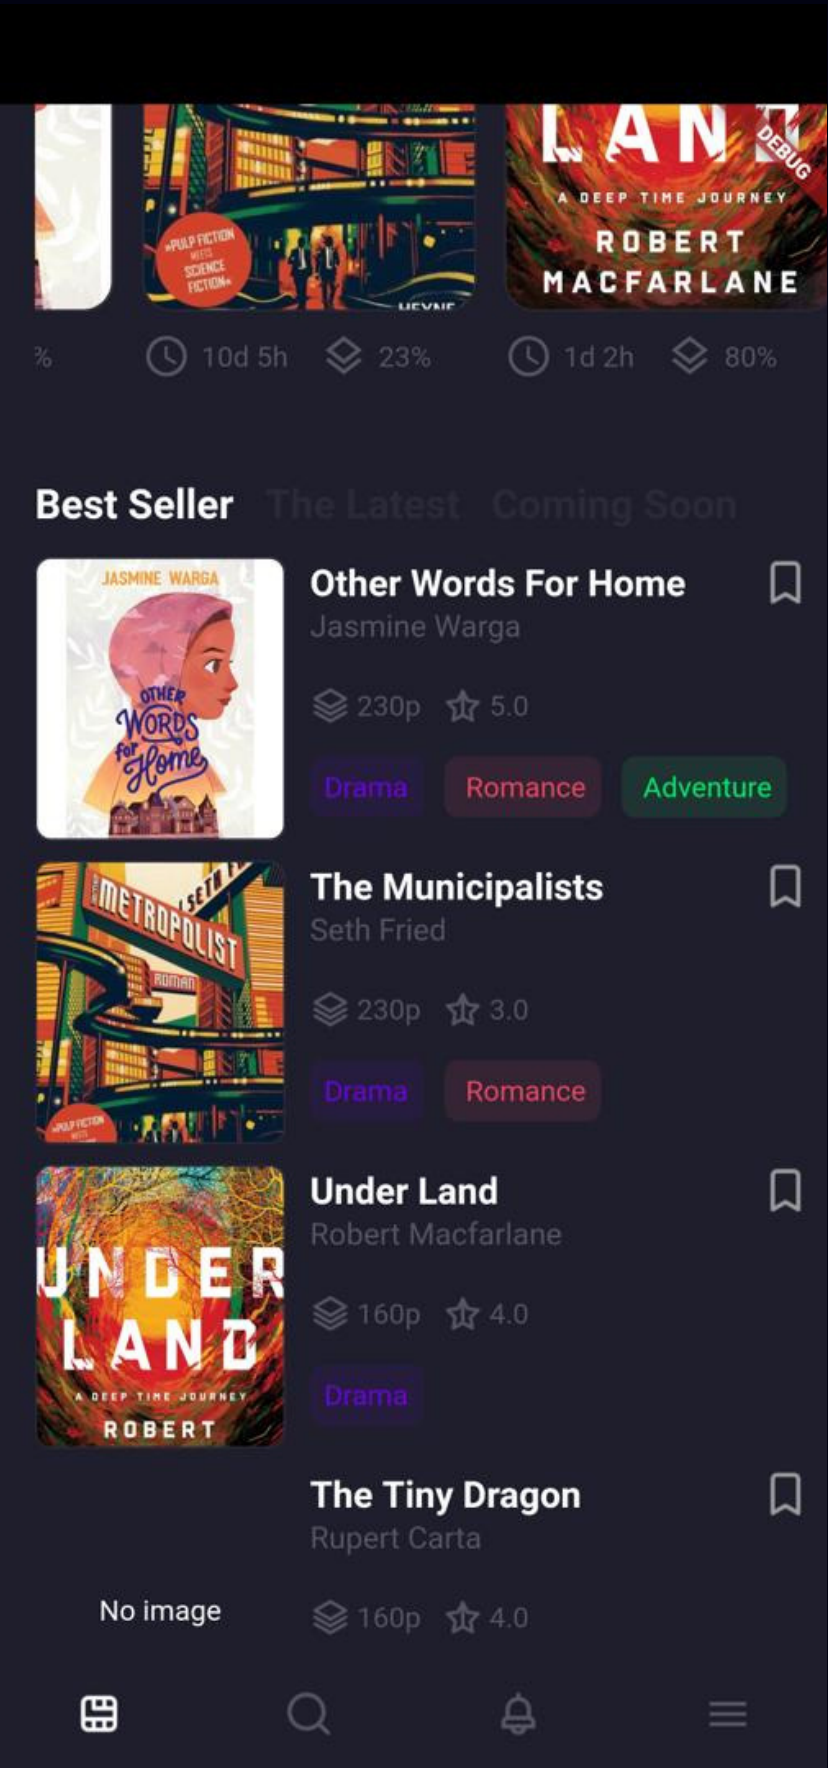

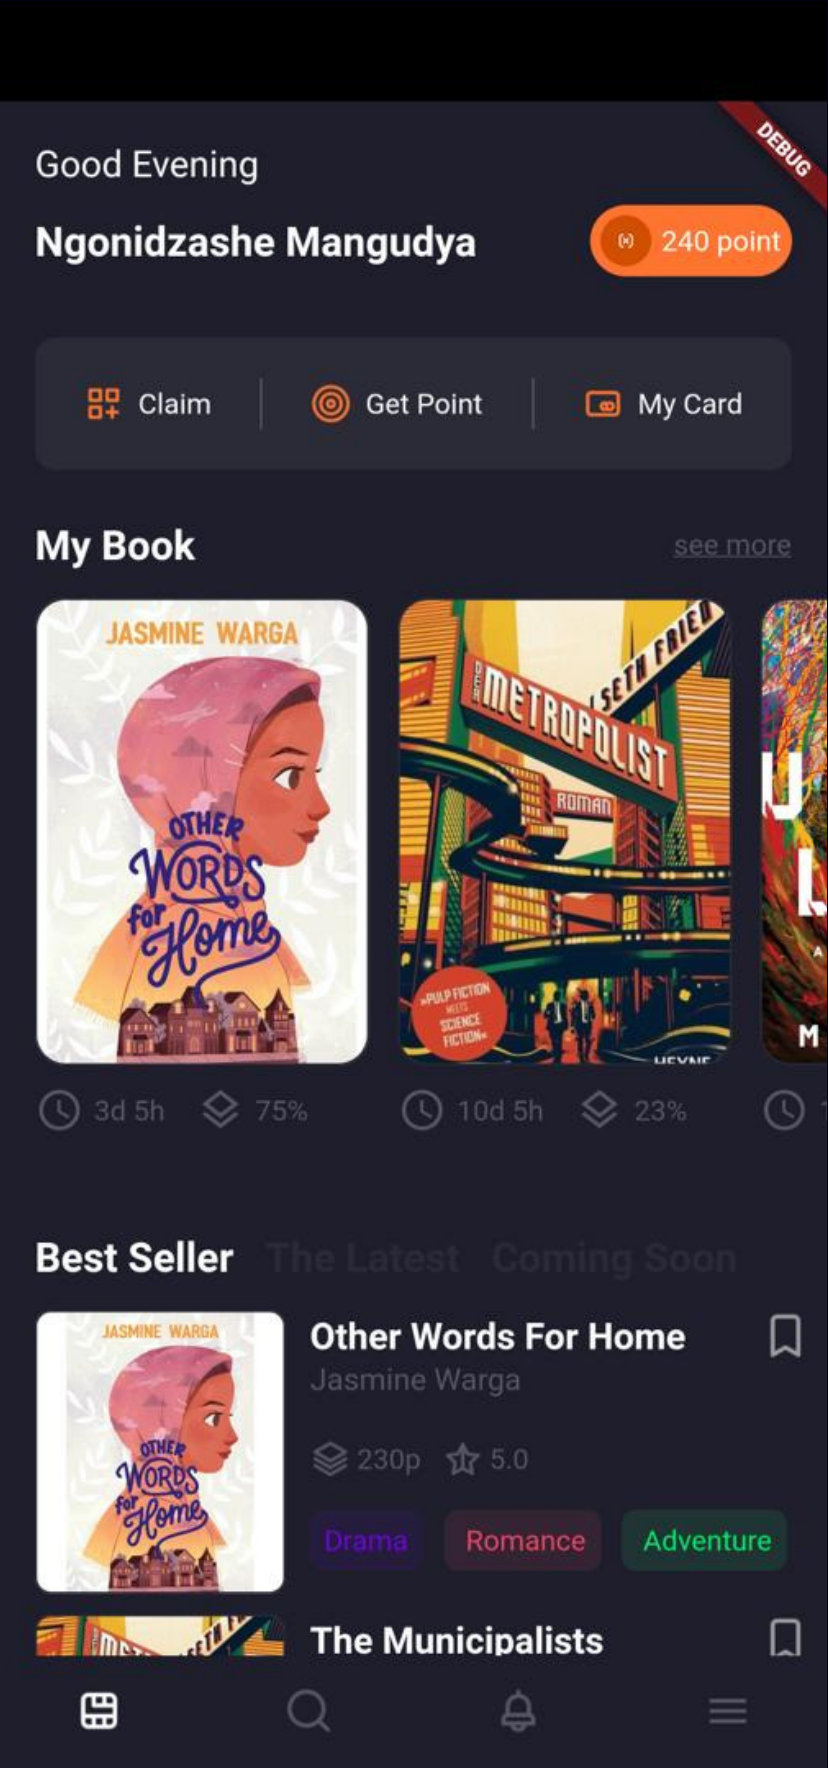

Link: <https://github.com/iamngoni/lingua>

## Description

This app is for teaching people sign language using the sign language alphabet – it also allows users to input a word and the apps illustrates the word using sign language

# Book Reader App

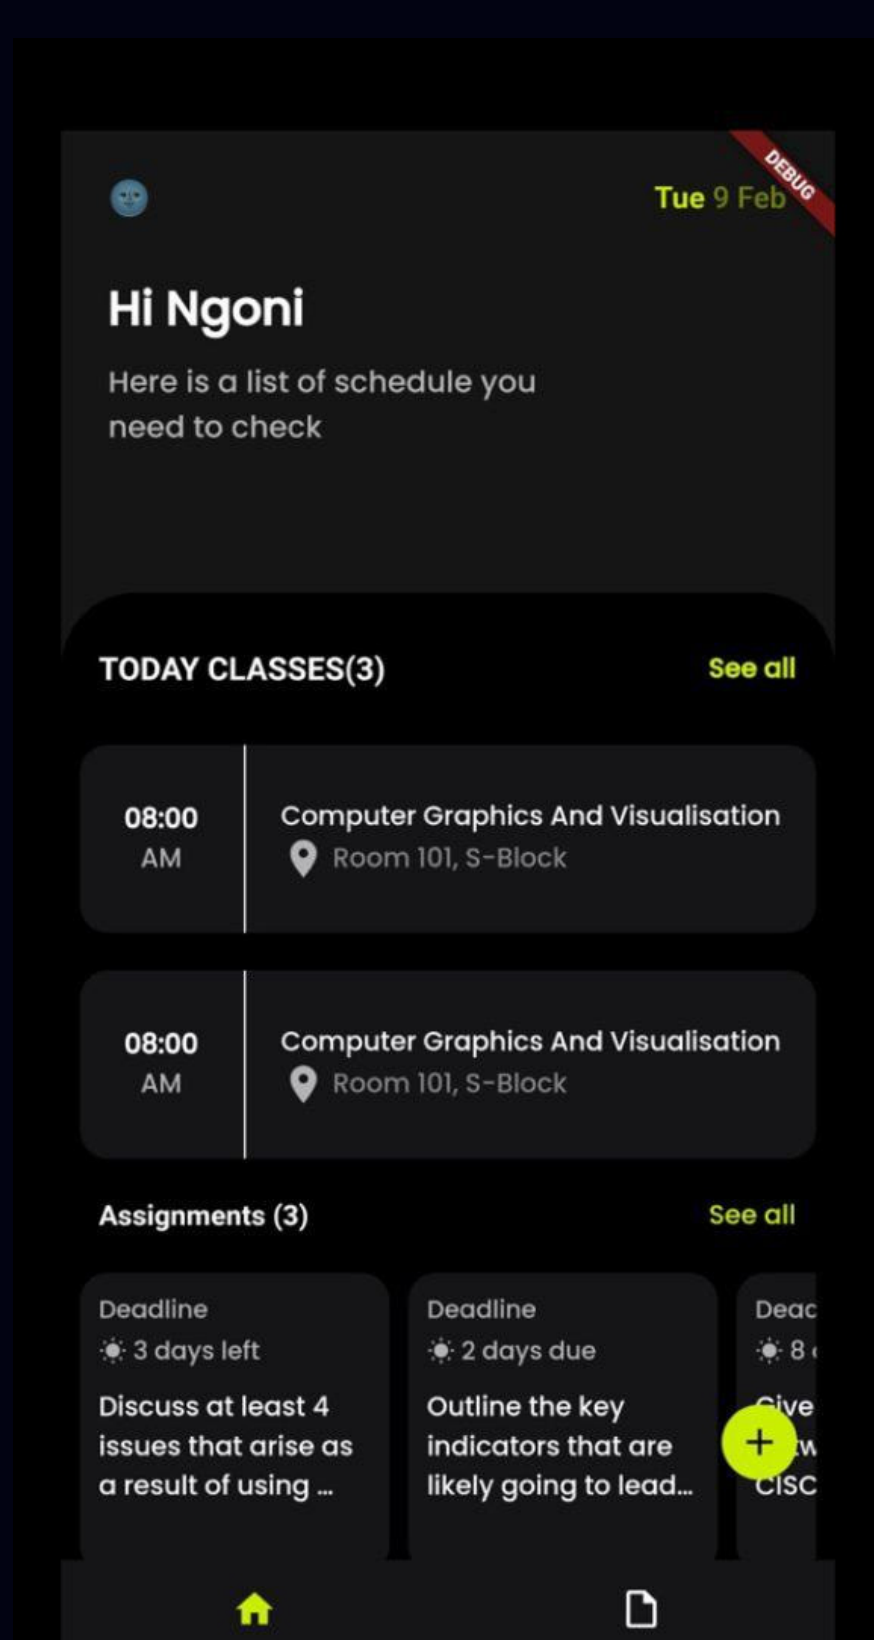

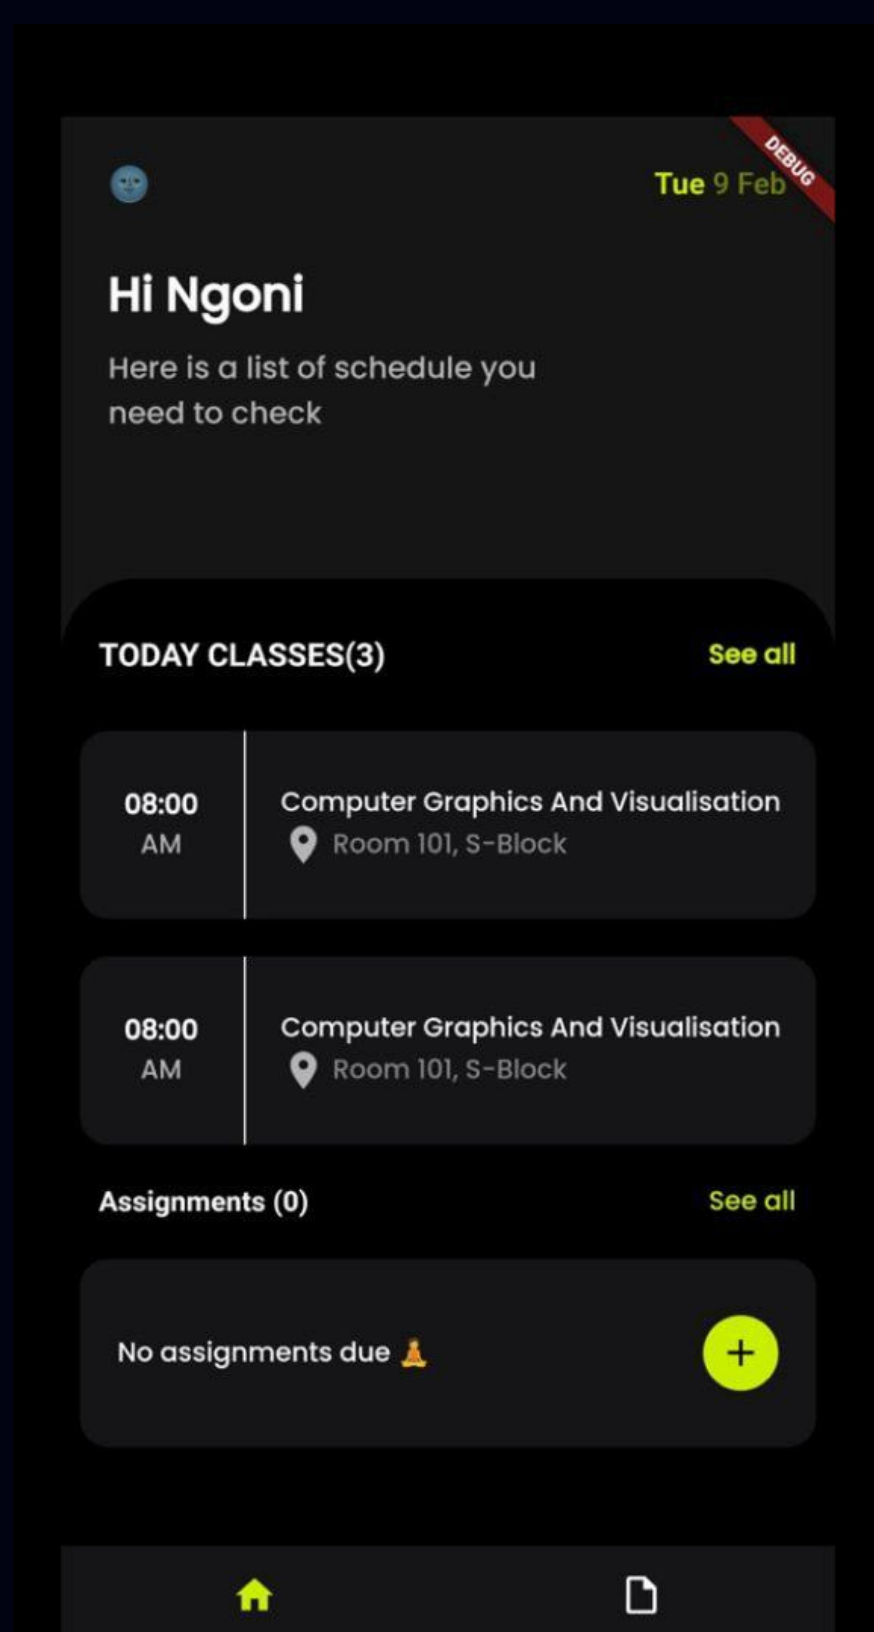

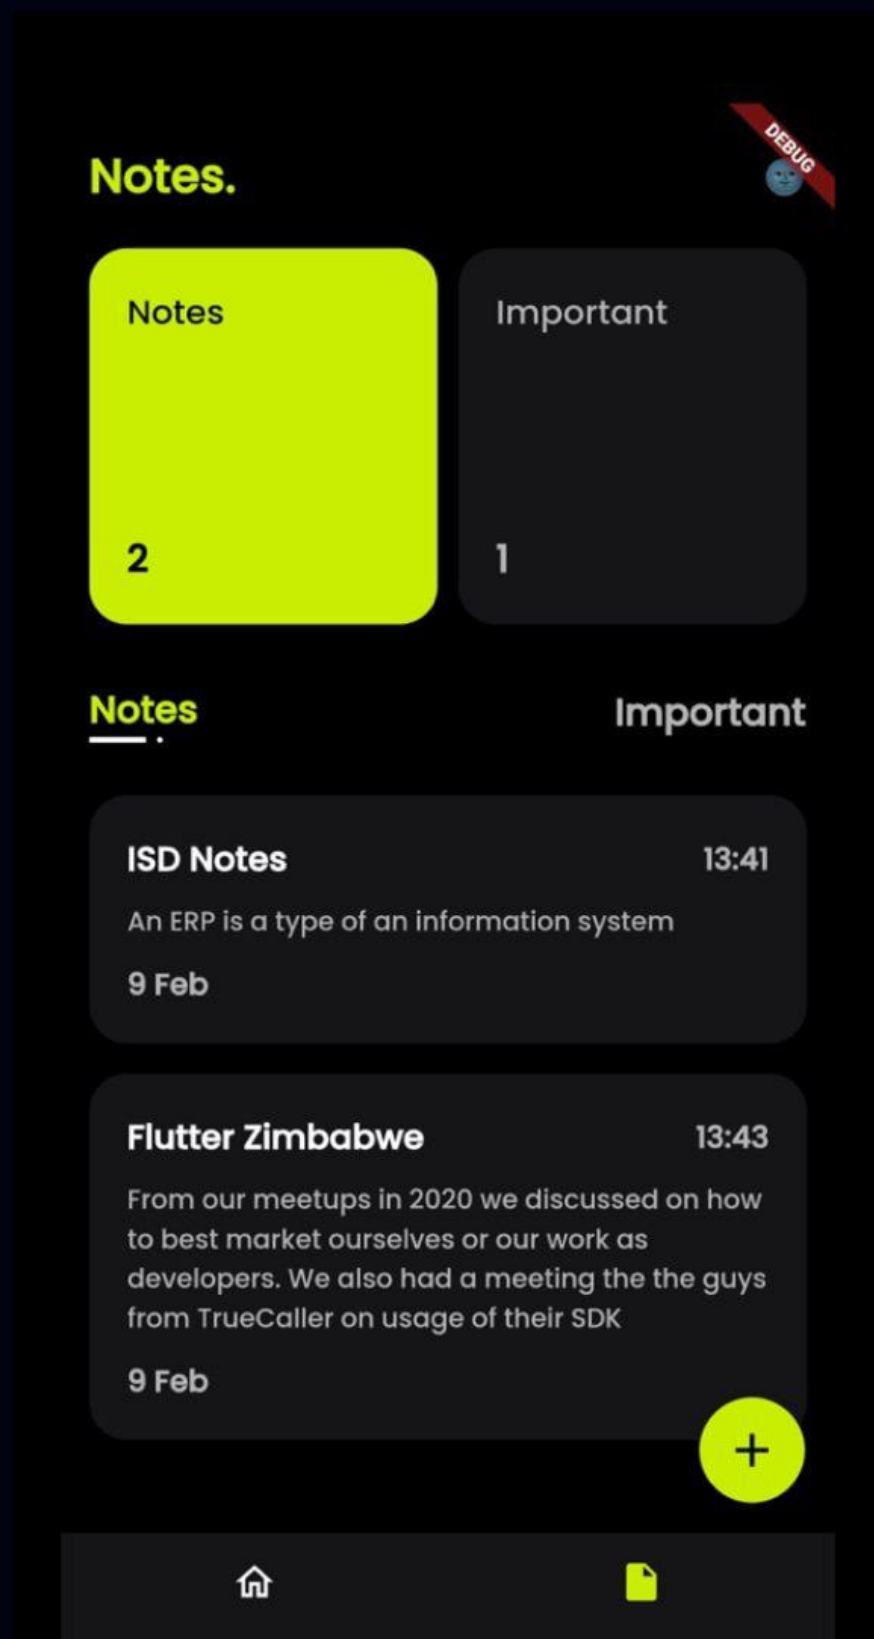

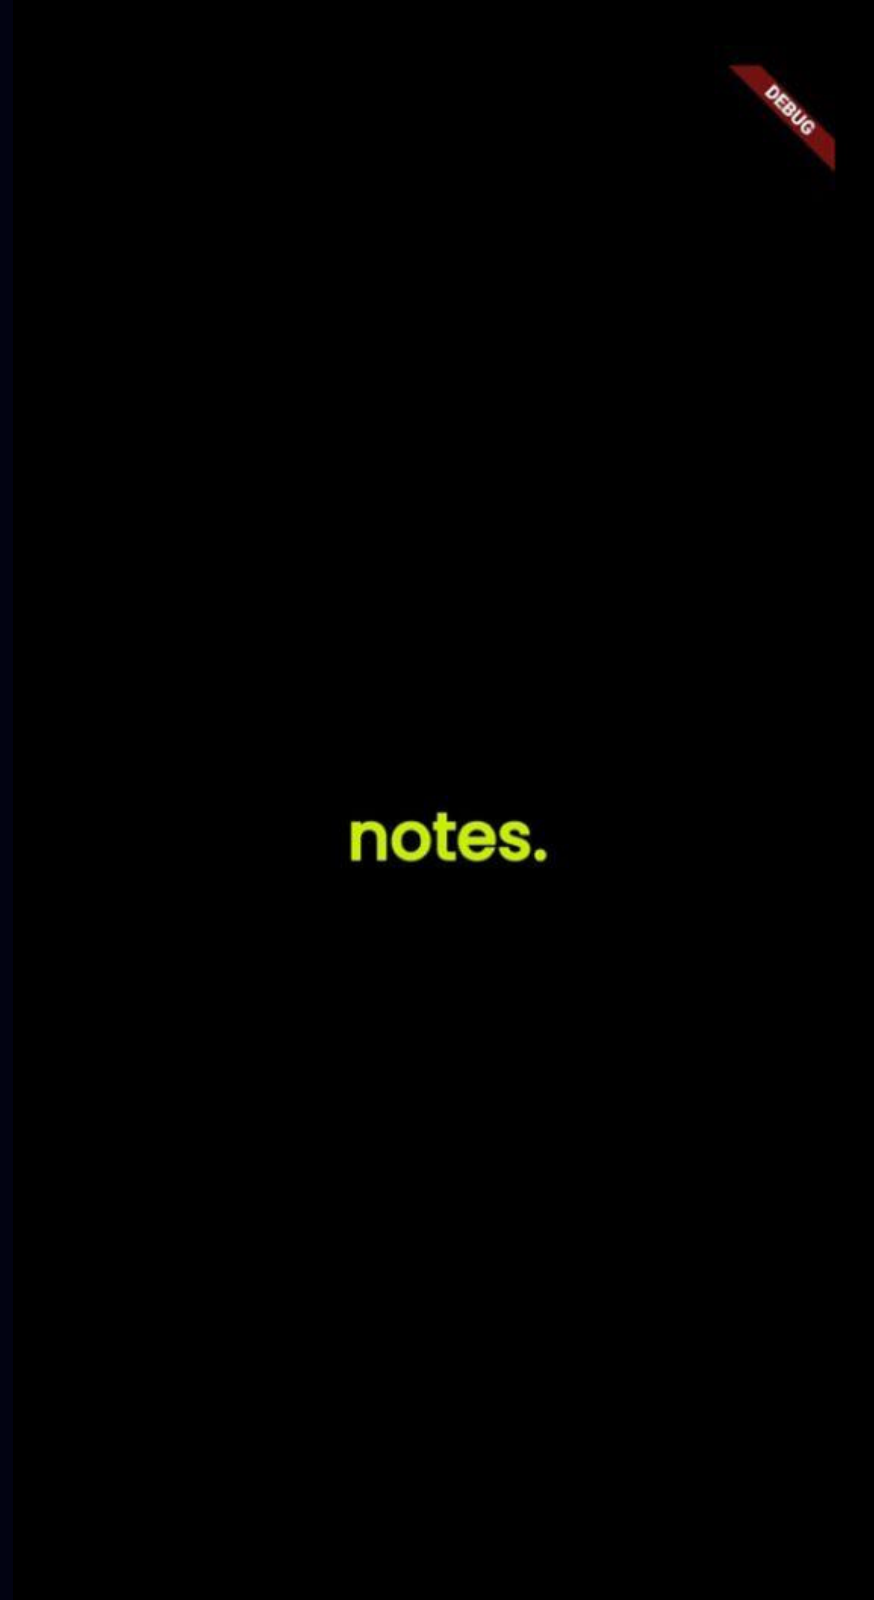

Link: [https://github.com/iamngoni/book\\_app](https://github.com/iamngoni/book_app)

# Notes

## Dark Mode

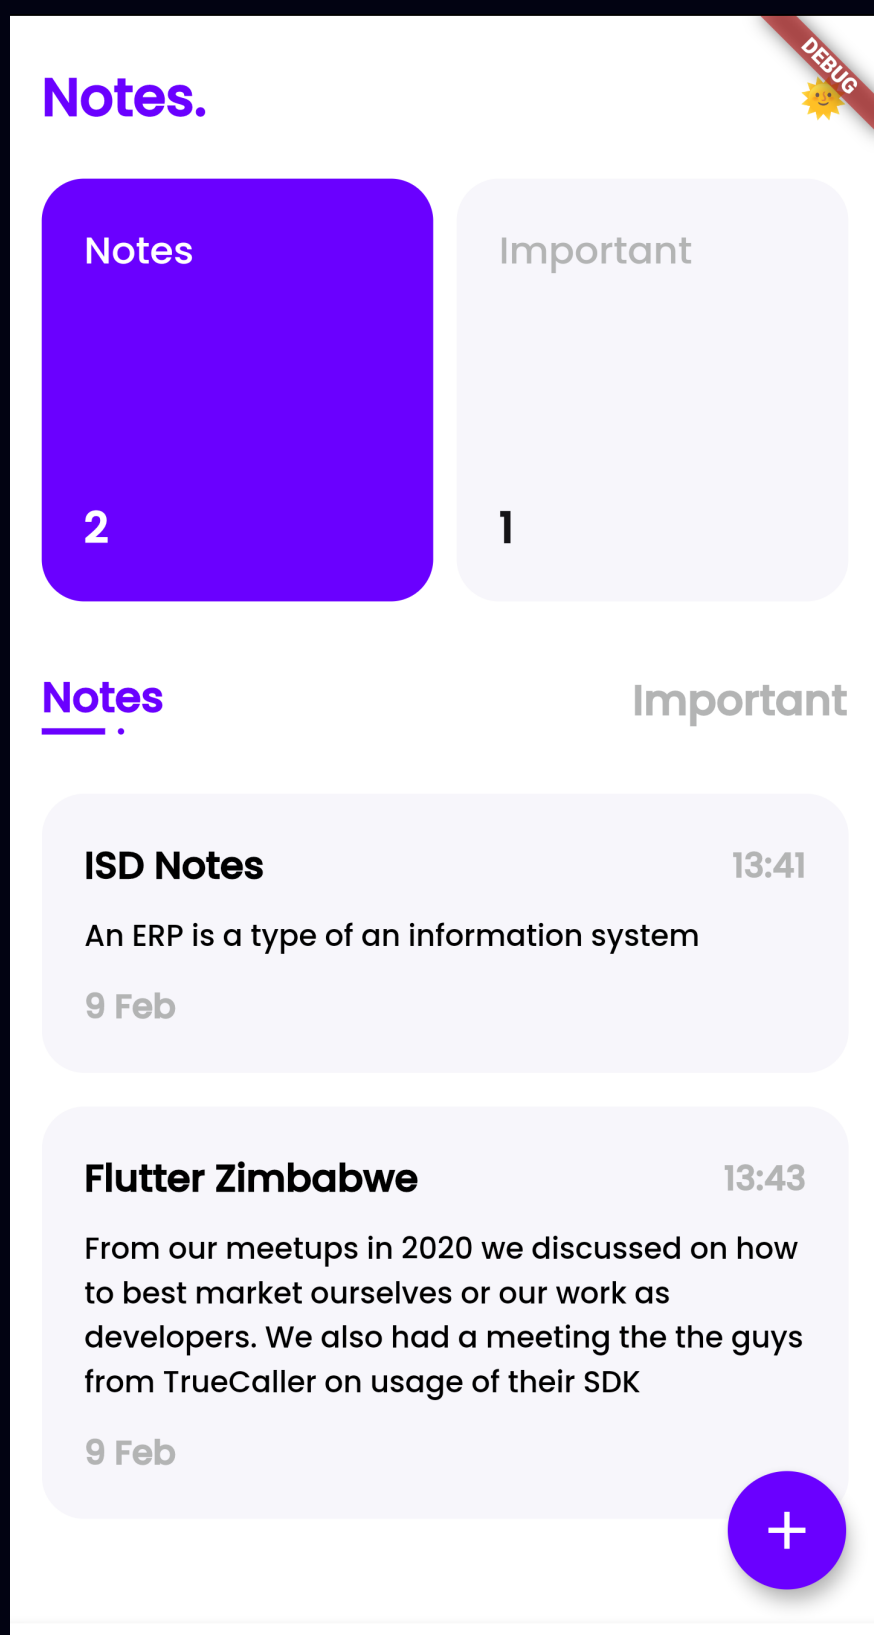

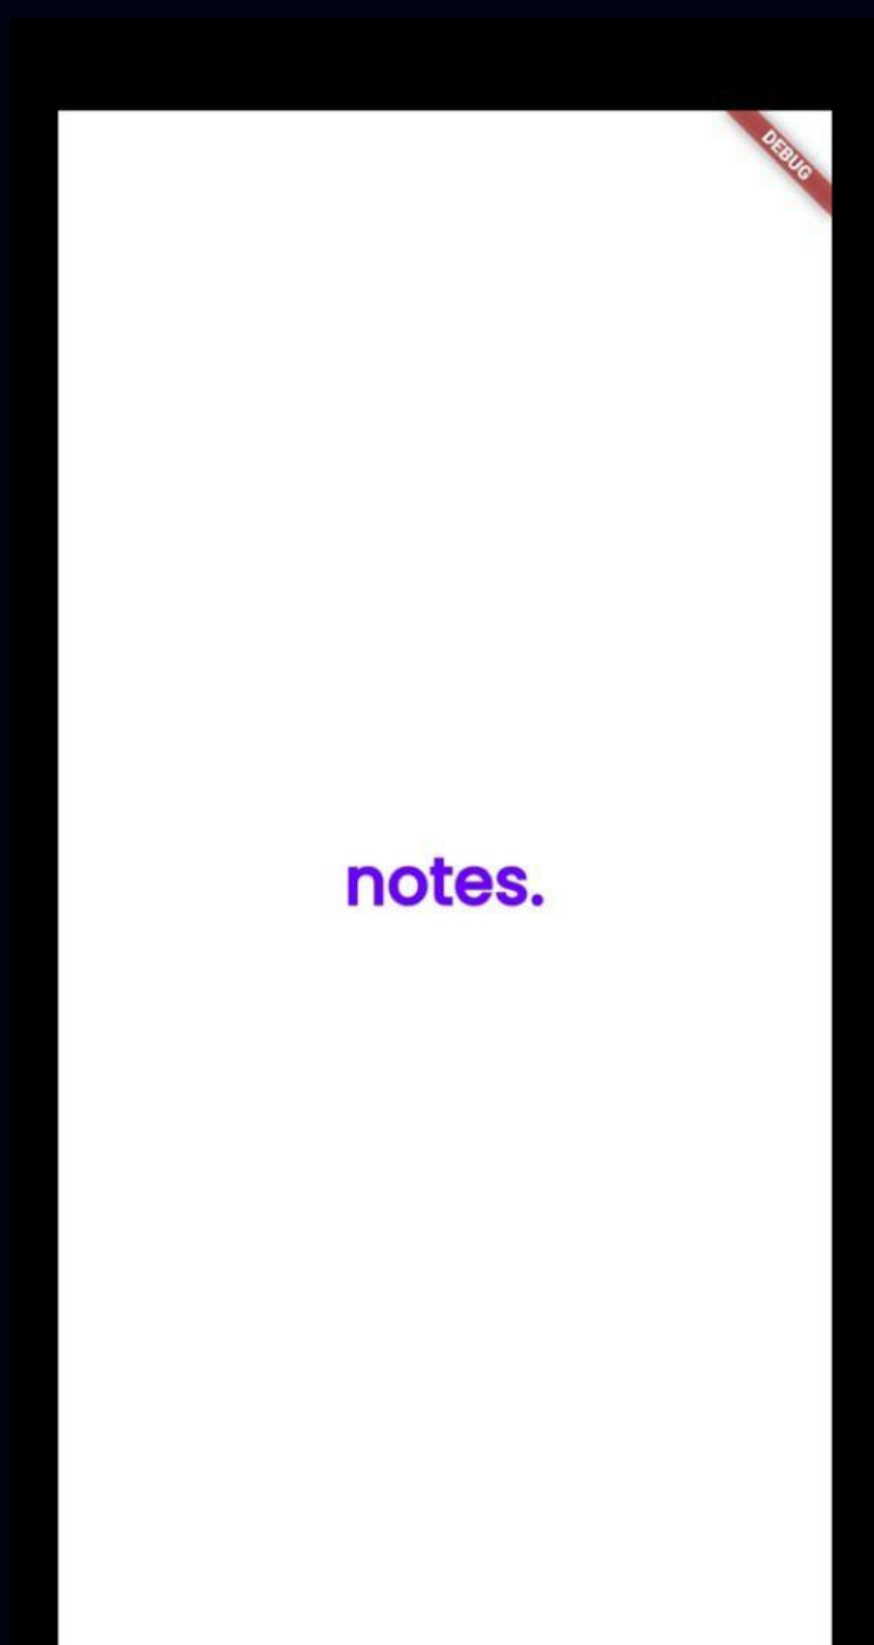

Link: <https://github.com/iamngoni/notes>

## Description

The app is for saving notes during classes, save assignments so a student can be reminded when due and also save class schedule.

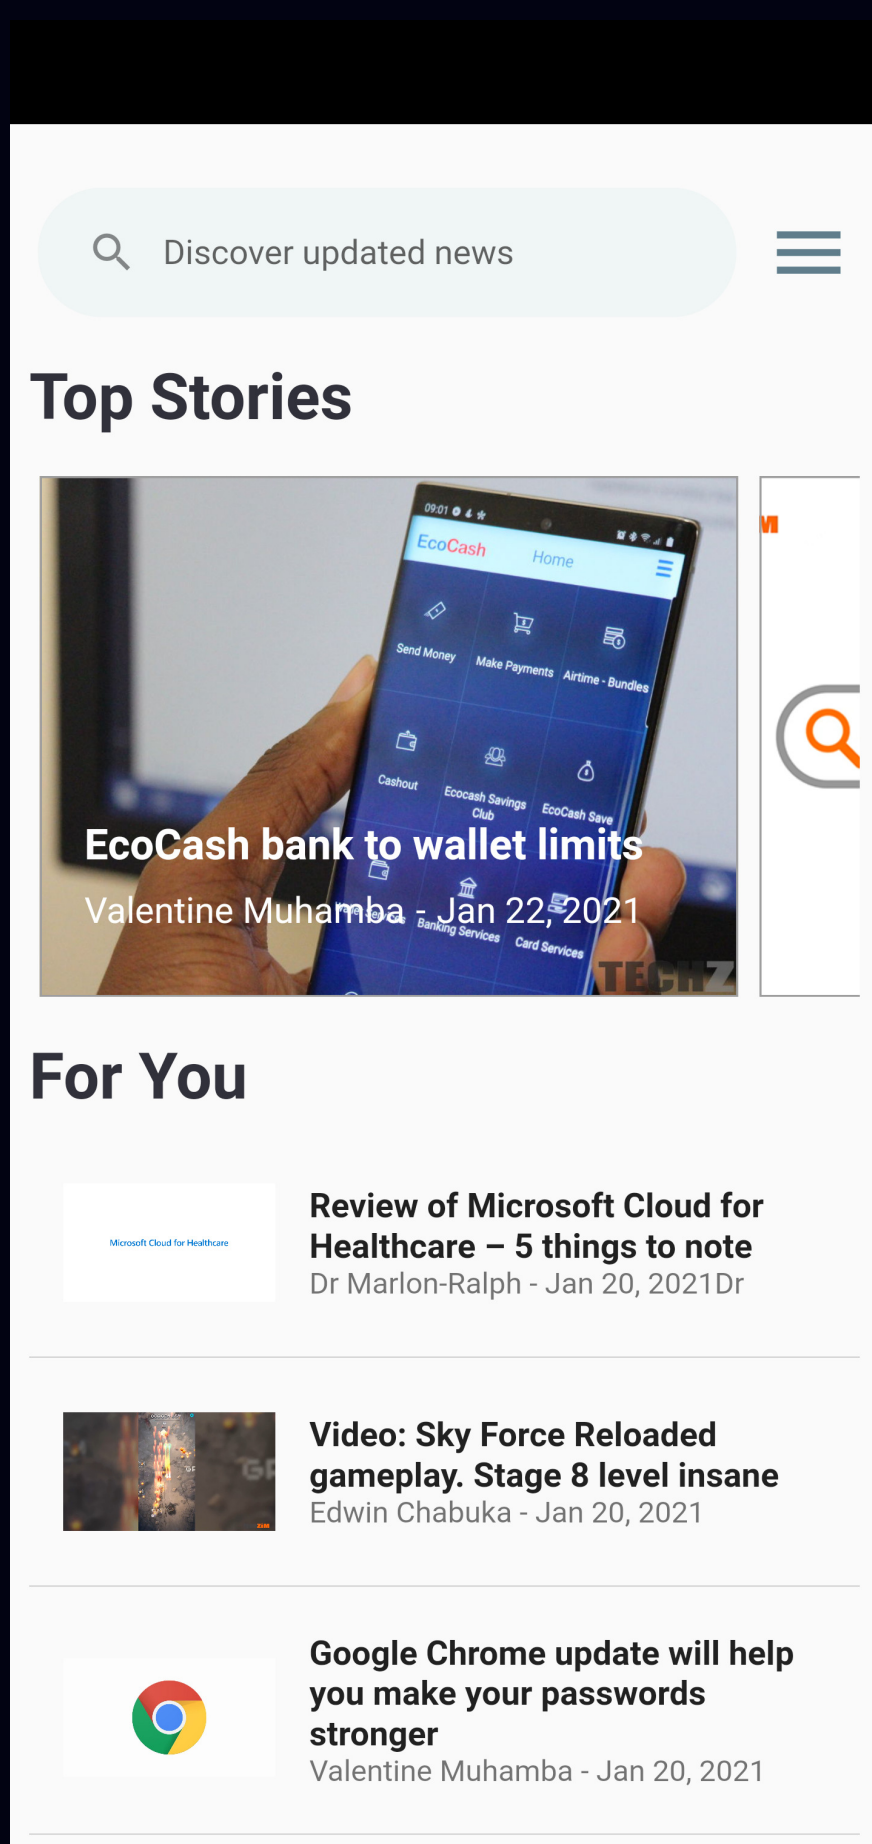

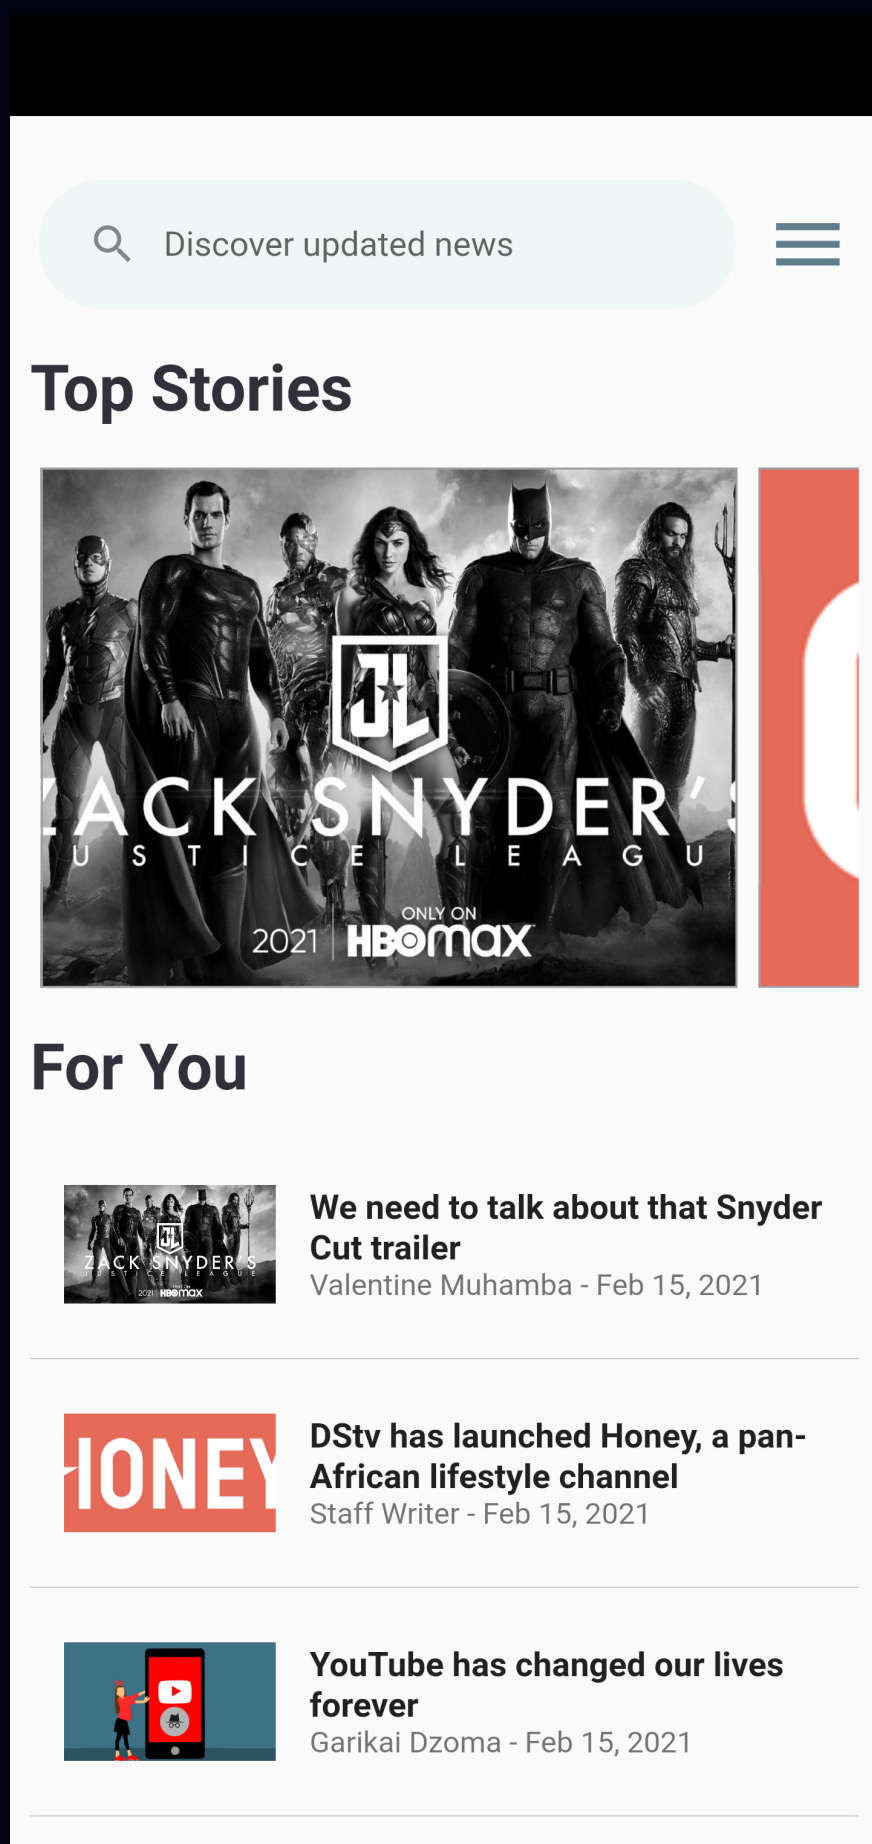

# Notes

## Light Mode

<https://github.com/iamngoni/notes>

# Techzim News Clone

Link: <https://github.com/iamngoni/notes>

## Description

The app makes use of news headlines scraped from the official Techzim news website - therefore the headlines are always uptodate
